

Delivering Dreams

International Surrogacy Agency

WHAT MAKES OUR DONORS GREAT

We are incredibly selective with our egg and sperm donors. We reject over 70% of applicants based on their applications alone. We seek to attract bright, healthy young women intent on creating a win-win situation where the generous act of providing eggs to intended parents is rewarded with compensation that will make a difference.

All our donors must meet the requirements for egg donors by law by the Ministry of Health of Ukraine as well as our additional stringent standards.

Egg donors in our program must:

- Have at least one healthy child born naturally
- Be between 20 and 32 years old
- Have no criminal record
- Have no family history of poor health, disease or disorders
- Not smoke, drink or use drugs
- Have no exposure to chemicals or other dangers

Our donors undergo rigorous testing before they are offered to you. Egg donors can only enter our program only after passing these tests:

- Full bloodwork and urine analysis
- Karyotype
- Fragile X
- Coagulogram
- Txoplasmosis, rubella
- Hepatitis B and C
- PAP Smear and cytological test
- AMH, LH, Estradiol
- Psychological test
- Cystic fibrosis
- Biochemical blood test,
- Chlamydia, ureaplasma, micoplasma
- HIV, AIDS
- Syphilis
- Ovary ultrasound
- RH factor

Egg donors in Ukraine by law must be anonymous. We share information to you within that restriction. This includes: photos, hair and eye color, weight and height, education level, hobbies etc.
